# MTEKManager

## Configuration & Communication Software for all MTEK and AE Series Instruments

MTEK Manager is Metretek's Windows™ application software for configuring and communicating with all of our flow computer, volume corrector and measurement/recording instruments. MTEKManager supports both 5000 and 6000 series instruments.

### Features & Benefits

- User configurable station display
- Export data to Metretek DC2000 systems
- Powerful Alarm Viewer
- Supports auto-polling on schedule
- Context sensitive HELP
- Five basic report types
- Data stored in .mdb (Access) files
- Fully compatible with Metretek's InvisiConnect™ System for IP over cellular communications

### Requirements: (subject to change without notice)

IBM compatible PC with:

1. 500MHZ or better processor
2. 128Megabyte or more RAM
3. 5Gigabyte or more hard disk space
4. One or more available asynchronous COM ports
